INSECT EXTERMINATORS - LED

FEATURES

- High quality UV-A LED for best attraction
- Electronic transformer to ensure effective kill rate
- ABS fireproof material for safety
- Full open design
- Removable collection tray for easy cleaning
- Coverage 300SQM

MEDIUM IEA1003 SPECIFICATIONS

VOLTAGE	: 230V - 50Hz
DIMENSIONS	: 470 X 100 X 263MM
WEIGHT	: 1.7KG

ULTRA VIOLET

SMALL IEA1001 SPECIFICATIONS

VOLTAGE	: 230V
DIMENSIONS	: 395 X 95 X 300MM
LAMPS	: 2 X 10W
WEIGHT	: 1.74KG

MEDIUM IEA1002 SPECIFICATIONS

VOLTAGE	: 230V
DIMENSIONS	: 645 X 95 X 390MM
LAMPS	: 2 X 20W
WEIGHT	: 11.06KG

- Electronic transformer to ensure effective kill rate.
- ABS fireproof material for safety
- Full open design
- Removable collection tray for easy cleaning
- Coverage 300sqm

ECO-FRIENDLY PEST CONTROL

This cutting-edge LED insect exterminator offers you the next generation of pest control technology. It uses tiny UV LED lights instead of the large, fragile bulbs of the past. This means the whole unit is lighter, more energy-efficient, and more eco-friendly as it contains no gases or mercury elements.

NO NEED TO REPLACE BULBS

The LEDs will effectively attract flies for over 20,000 hours, meaning they last over 10 times longer than traditional insect exterminator tubes.

SUPERB COVERAGE AND POWERFUL UV LED'S

If placed properly in a room, it can cover up to 300m² in UV light, attracting flies and other flying insects around. Both sides of the unit are open, so it can attract and zap bugs from all angles!

HYGIENIC COLLECTING TRAY

This tray is easy to remove so you can keep your unit hygienic at all times.

FREE HANGING CHAIN

It's always best to put your fly killer in a place where the UV light it emits won't be obstructed by furniture or other objects.

TOUGH ABS HOUSING

The LED lights and zapping grid are housed inside a tough casing that's scratch-resistant, corrosion-proof, and fireproof.
